

CLAIM AMENDMENTS

1. (Canceled).
2. (Currently Amended) A combination ~~device~~ as in claim 38 wherein said wall is raised relative to the exterior surface of said tubular member.
3. (Currently Amended) A combination ~~device~~ as in claim 38 wherein said aperture is threaded internally and said end of said connecting member is externally matingly threaded for engaging into said internally threaded aperture.
4. (Currently Amended) A combination ~~device~~ as in claim 2 wherein said aperture is threaded internally and said end of said connecting member is externally matingly threaded for engaging into said internally threaded aperture.
5. (Currently Amended) A combination ~~device~~ as in claim 38 further including a lock nut along said end of said connecting member for locking said end of said connecting member into said aperture.
6. (Currently Amended) A combination ~~device~~ as in claim 2 further including a lock nut along said end of said connecting member for locking said end of said connecting member into said aperture.
7. (Currently Amended) A combination ~~device~~ as in claim 3 further including a lock nut along said end of said connecting member for locking said end of said connecting member into said aperture.
8. (Currently Amended) A combination ~~device~~ as in claim 4 further including a lock nut along said end of said connecting member for locking said end of said connecting member into said aperture.
9. (Currently Amended) A combination ~~device~~ as in claim 38 wherein a stop member projects internally at about the middle of said tubular member.
10. (Currently Amended) A combination ~~device~~ as in claim 2 wherein a stop member projects internally at about the middle of said tubular member.
11. (Currently Amended) A combination ~~device~~ as in claim 3 wherein a stop member projects internally at about the middle of said tubular member.
12. (Currently Amended) A combination ~~device~~ as in claim 4 wherein a stop member projects internally at about the middle of said tubular member.
13. (Currently Amended) A combination ~~device~~ as in claim 5 wherein a stop member projects internally at about the middle of said tubular member.

14. (Currently Amended) A combination ~~device~~ as in claim 6 wherein a stop member projects internally at about the middle of said tubular member.

15. (Currently Amended) A combination ~~device~~ as in claim 7 wherein a stop member projects internally at about the middle of said tubular member.

16. (Currently Amended) A combination ~~device~~ as in claim 8 wherein a stop member projects internally at about the middle of said tubular member.

17. (Canceled).

18. (Currently Amended) A combination ~~device~~ as in claim 38 wherein said wall is raised relative to the exterior surface of said tubular member.

19. (Currently Amended) A combination ~~device~~ as in claim 39 wherein said aperture is threaded internally and said end of said connecting member is externally matingly threaded for engaging into said internally threaded aperture.

20. (Currently Amended) A combination ~~device~~ as in claim 18 wherein said aperture is threaded internally and said end of said connecting member is externally matingly threaded for engaging into said internally threaded aperture.

21. (Currently Amended) A combination ~~device~~ as in claim 39 further including a lock nut along said end of said connecting member for locking said end of said connecting member into said aperture.

22. (Currently Amended) A combination ~~device~~ as in claim 18 further including a lock nut along said end of said connecting member for locking said end of said connecting member into said aperture.

23. (Currently Amended) A combination ~~device~~ as in claim 19 further including a lock nut along said end of said connecting member for locking said end of said connecting member into said aperture.

24. (Currently Amended) A combination ~~device~~ as in claim 20 further including a lock nut along said end of said connecting member for locking said end of said connecting member into said aperture.

25. (Currently Amended) A combination ~~device~~ as in claim 39 wherein a stop member projects internally at about the middle of said tubular member.

26. (Currently Amended) A combination ~~device~~ as in claim 18 wherein a stop member projects internally at about the middle of said tubular member.

27. (Currently Amended) A combination ~~device~~ as in claim 19 wherein a stop member projects internally at about the middle of said tubular member.

28. (Currently Amended) A combination ~~device~~ as in claim 20 wherein a stop member projects internally at about the middle of said tubular member.

29. (Currently Amended) A combination ~~device~~ as in claim 21 wherein a stop member projects internally at about the middle of said tubular member.

30. (Currently Amended) A combination ~~device~~ as in claim 22 wherein a stop member projects internally at about the middle of said tubular member.

31. (Currently Amended) A combination ~~device~~ as in claim 23 wherein a stop member projects internally at about the middle of said tubular member.

32. (Currently Amended) A combination ~~device~~ as in claim 24 wherein a stop member projects internally at about the middle of said tubular member.

33. (Currently Amended) The combination ~~device~~ of claim 38, wherein said end of said connecting member is positioned within the confine of said tubular member in contact with said one conduit.

34. (Currently Amended) The combination ~~device~~ of claim 38, wherein each of said ends of said tubular member is externally threaded for receiving said conduit.

35. (Currently Amended) The combination ~~device~~ of claim 38, wherein each of said ends of said tubular member further having an opening through said tubular member, said opening is internally threaded to receive a set screw for securely positioning said conduit.

36. (Canceled).

37. (Currently Amended) The combination ~~device~~ of claim 38, wherein said aperture is generally perpendicular to said longitudinal axis of said tubular member.

38. (Currently Amended) A combination ~~device~~ of a coupling member and a connecting member for positioning and securing an electrical wire-carrying conduit to a remote supporting structure, wherein comprising:

a said coupling member is adapted to receive and support said conduit, said coupling member comprising a tubular member having at least one end, said end adapted to receive one end of said conduit, and said tubular member having a wall containing an aperture facing said remote supporting structure; and

a said connecting member having opposite ends, one end of said connecting member securely engaging said aperture in said wall of said tubular member, the opposite end of said connecting member extending outwardly beyond said wall and adapted to securely engage said remote supporting structure, to securely hold and support said coupling member and said conduit in a selected position.

39. (Currently Amended) A combination ~~device~~ of a coupling member and a connecting member for positioning and securing a pair of electrical wire-carrying conduits to a remote supporting structure, wherein comprising:

a said coupling member adapted to receive and support said conduits, said coupling member comprising an integral tubular member having a generally cylindrical wall surrounding an interior space and opposed axially aligned ends, each of said ends adapted to receive one end of one of said pair of conduits, and said tubular member having an aperture through said cylindrical wall into said interior space facing said remote supporting structure; and

a said connecting member having opposite ends, one end of said connecting member securely engaging said aperture in said wall of said tubular member such that said end of said connecting member extends into said interior space to securely engage said ends of said conduits received in said coupling member, the opposite end of said connecting member extending outwardly beyond said wall and adapted to securely engage said remote supporting structure, to securely hold and support said coupling member and said pair of conduits in a selected position.

40. (Currently Amended) The combination ~~device~~ of claim 38 wherein said tubular member further having a wall surrounding an interior space, wherein said aperture receives said end of said connecting member within said interior space.
